Software Engineer

Computer Science graduate with a strong foundation in **front-end web development** and hands-on experience building responsive, user-focused applications. Familiar with **Oracle SQL** for querying, managing, and understanding database structures, with growing exposure to Oracle Database environments. Although still learning advanced Oracle tools and frameworks, I am motivated, quick to learn, and eager to strengthen both **frontend** and **database** skills while contributing effectively to modern, impactful projects. A fast learner with a solid **leadership** background through university **event management** roles, committed to continuous improvement and contributing to innovative, high-value work.

WORK EXPERIENCE

Logiciel Pvt. Ltd • Karachi

2026 - Present

Solutions Engineer

- Monitored and analyzed equity trade orders and executions using the FIX protocol, ensuring accurate order lifecycle tracking across trading systems.
- Reviewed FIX protocol logs and system-generated data to track order status, execution updates, and transaction flows.
- Used SQL to query internal databases for trade details, verify order records, identify discrepancies, and support day-to-day operational analysis.

EDUCATION

Bachelor of Science in Computer Science

FAST NUCES • Karachi

2021 - 2025

PROJECTS

EBITH –AI-Based Assistive System (FYP)

Flutter, Flask, Python, YOLOv8, LSTM, ReactNative, MySQL

Designed and implemented an AI-powered system aimed at assisting individuals who are blind or deaf-mute. The system enables real-time object detection to aid in navigation for visually impaired users and translates hand gestures into speech to facilitate communication for those with hearing and speech impairments. It integrates gesture recognition and object detection into a unified, responsive interface, providing real-time feedback to enhance user independence and accessibility.

Inventory Management Database

Oracle SQL

Created a basic inventory database to manage products, stock levels, and supplier information. Designed tables with primary and foreign keys, added sample data, and wrote SQL queries to update stock, view low-stock items, and generate simple inventory reports. This project helped me practice writing queries and understanding how relational databases are structured.

SKILLS

- **Programming Languages:** C, C++, JavaScript
- **Frontend:** HTML, CSS, Bootstrap, React.js
- **Database:** Oracle SQL– writing queries, managing data, understanding relational structures, MySQL – schema design, CRUD operations, Understanding of Relational Database Concepts, joins, normalization

EXTRACURRICULAR

SPORTICS FAST NUCES

2024 - 2025

Event Manager

Led event planning and resource management for a multi-sport university competition.

PROCOM FAST NUCES

2023 - 2024

Tech Fest Head

Managed and supervised the Tech Fest segment within Procom, overseeing team coordination, scheduling, and smooth execution of activities.
