

MUHAMMAD TAHA ASIM

Karachi, Pakistan | +92 3052311920 | taha.asim2025@gmail.com | [LinkedIn]

PROFESSIONAL SUMMARY

Electrical Engineer with experience in power systems, industrial operations, and renewable energy. Skilled in high-voltage distribution, electrical testing, and technical documentation for substations and solar projects.

WORK EXPERIENCE

Peoples Steel Mills Ltd

Management Trainee Officer

Aug 2025-Present

- **STATCOM Development:** Authored control philosophy and technical paperwork for Static Synchronous Compensators to improve grid stability.
- **Substation Ops:** Managed 132kV/11kV MV step-down operations and industrial distribution, including MV switchgear and power transformers.
- **Solar Integration:** Led inverter synchronization, Voc diagnostics, and Megger insulation testing for a 5MW grid-tied solar plant.
- **Industrial Power:** Managed technical operations for Electric Arc (EAF) and Induction Furnace transformers.
- **Compliance:** Updated site-wide Single Line Diagrams (SLDs) and performed electrical testing for safety standards.

Civil Aviation Authority

Engineering Intern

May 2025-June 2025

- Conducted runway power surveys and fault mitigation for critical aviation infrastructure.
- Analyzed HMI control systems for automated generators to ensure ICAO-compliant reliability.

EDUCATION

NED University of Engineering & Technology

B.E. Electrical Engineering (2025)

2021-2025

PROJECTS

NILM (Final Year Project)

- Engineered a MATLAB-based Non-Intrusive Load Monitoring system for appliance-level monitoring and automated load shedding to optimize energy consumption.

2MW Solar Plant (PSM)

- Supervised PV array integration and conducted pre-commissioning Voc diagnostics to ensure seamless grid synchronization.

SKILLS

- **Software:** MATLAB, ETAP, AutoCAD, TIA Portal, Proteus, MS Excel.
- **Power & Solar:** 132kV/MV Substation Ops, Transformer O&M, 5MW/2MW Solar Integration.
- **Automation & Testing:** PLC, SCADA, HMI, Megger & Voc Testing, SLD Drafting.

CERTIFICATIONS

- **Industrial Automation:** PLC, SCADA, & Control Logic (Intermediate) – IS COP (2026).

INTERSETS

- Power Systems Analysis
- Power Generation
- IoTs
- Automation
- Sales and Marketing
