SOFTWARE ENGINEER

I am a Software Engineer with 2 years in backend systems, database retrieval, and computer vision. In addition to this i have built scalable applications and APIs on MERN stack. I excel at using data structures, and object oriented techniques to construct frameworks that can integrate logic while providing increased performance time. I am seeking a software engineer position to improve my skills while also benefiting the organization.

EDUCATION

Bachelor of science in Computer Science (BSCS)

National University of Computer and Emerging Sciences (FAST)

CGPA 3.37 / 4.0

Karachi, Pakistan | 2023 - Present

TECHNICAL SKILLS

C++	Node.js	OOP
Python	PostgreSQL	.Net framework
C#	MongoDB	Linux / Unis
React.js	REST APIs	Git / Version Control

PROJECTS

OREZ – Web-Based Version Control System

React, Node.js, PostgreSQL

- Implemented SHA-1 hashing for blobs and trees to track file history and replicated Git's core model
- Transferred validation logic to PL/pgSQL stored procedures for atomic transaction and consistency

Secure Sense – Advanced Surveillance System

C++, OpenCV, File Handling

- Developed a Motion Detection and Face Recognition application using OpenCV
- Developed a contactless attendance system that captures and recognizes faces and automatically records their entry in an Excel exportable CSV file

PROFESSIONAL EXPERIENCE

web Development Assistant

FAST NUCES (Supervised by Dr. Nadeem Kafi)

August 2025 - September 2025

- Designed the full architecture of a pharmaceutical ERP system with 8 integrated modules.
- Created and improved high performance REST APIs for managing cross module data integrity for real time inventory reporting.

Software Engineer Intern

Systems Ltd

August 2024 - September 2024

- Improved database queries which improved server response time by 200ms for queries made during high traffic
- Reduced the manual workload for the team by 5 hours per week by automating internal workflows of the system.
