PROFESSIONAL SUMMARY

Full Stack and Flutter Developer with 2 years of professional experience building cross-platform mobile applications, responsive React.js web frontends, and Python FastAPI backend systems. Proficient in Flutter, React.js, Next.js, Clean Architecture, component-based development, BLoC state management, REST API integration, and Linux server deployment. Experienced in AI-integrated production systems including facial recognition pipelines, FAISS/Qdrant vector databases, and Retrieval-Augmented Generation (RAG).

TECHNICAL SKILLS

Mobile: Flutter, Dart, BLoC, Provider, Clean Architecture, Cross-Platform Development, TensorFlow Lite, On-Device ML, Responsive UI

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Web Design, Component-Based Architecture, REST API Integration

Backend: Python, FastAPI, RESTful API Design, Oracle, MySQL, PostgreSQL, Firebase, JWT Authentication, Linux Server Deployment

AI / ML: YOLO, LSTM, FAISS, Qdrant, Vector Embeddings, RAG, Semantic Search, Facial Recognition, Prompt Engineering, XTTS

Tools: Git, GitHub, Docker, Postman, Agile, Scrum, CI/CD, Version Control, Unit Testing

PROFESSIONAL EXPERIENCE

Dewan Cement Limited
Software Engineer

November 2025 – Present
Karachi, Pakistan

- Designed and developed a full-stack **AI Leave Management System** with a Flutter mobile app, React.js web dashboard, and a Python FastAPI backend connected to Oracle and MySQL databases, serving 500+ employees.
- Built a facial recognition attendance pipeline using **FAISS vector database** for real-time biometric identity matching, reducing manual verification time by 80%.
- Architected a unified RESTful API layer consumed by both the Flutter and React.js clients, enforcing consistent business logic, JWT-based authentication, and role-based access control (RBAC) across Admin, HR, Manager, and Employee roles.
- Deployed the complete system on a **Linux production server**, handling service management, API routing, HTTPS configuration, and environment setup for stable 24/7 enterprise operation.
- Developed React.js ERP modules — employee management, attendance tracking, payroll dashboards, and analytics — using component-based architecture, responsive web design, and modular API-driven integration.

Cromptum
Associate Software Engineer

June 2025 – November 2025
Karachi, Pakistan

- Developed cross-platform Flutter applications using Clean Architecture and BLoC state management with responsive UI design and multilingual support.
- Integrated TensorFlow Lite for on-device ML inference and implemented a RAG pipeline using Qdrant vector database and LLAMACPP for intelligent document retrieval.
- Built RESTful API integrations and optimised application performance for low-resource field environments.

360 Expert Solution
Trainee React.js Developer

June 2024 – July 2024
Karachi, Pakistan

- Built responsive web interfaces using React.js, JavaScript (ES6+), HTML5, and CSS3; developed reusable component-based UI components and integrated REST APIs for dynamic data rendering.
- Practised version control with Git and GitHub within an Agile development team.

PROJECTS

Assistive Communication and Navigation System (*Final Year Project*)

Flutter, YOLO, TensorFlow Lite, LSTM

- Cross-platform Flutter mobile app for visually impaired users with real-time YOLO object detection, LSTM sign language recognition, and text-to-speech voice interaction — all on-device via TensorFlow Lite.

Enterprise Resource Planning (ERP) Platform

Next.js, React.js, REST APIs, RBAC

- Multi-company, multi-branch ERP web application in Next.js with hierarchical role-based access control, HR, inventory, and reporting modules with fully responsive design.

AI Knowledge Assistant (RAG System)

Python, FastAPI, FAISS, Qdrant, XTTS

- Retrieval-Augmented Generation system with FAISS and Qdrant semantic search, voice cloning via XTTS, and a FastAPI REST API backend for contextual AI responses.

EDUCATION

FAST National University of Computer and Emerging Sciences

August 2021 – June 2025

Bachelor of Science in Computer Science (BSCS) | Karachi, Pakistan

Dean's List of Honor – Semester 7 (SGPA: 3.73) | Finalist, University-Level Database Design Competition
